

Die Festung Hamburg Living Rules v21 - Release Notes

Significant changes from the previous version 19 are highlighted in **blue**.

The changes are for the most part rephrasing or more precise definitions of a rule, but there's a couple of relevant exceptions:

1. Orders can now have a specific and more limiting **Hierarchical Level**, or no Hierarchical Level at all (See 14 - Orders for details). This distinction has been introduced to define clearly how certain much discussed orders are intended to work, and has an impact on how an order is issued by an HQ and subsequently executed by the units under its command.
2. The delaying effect of Screen units has new limitations, to stop some excessively creative use of the Screen Areas.
3. The possibility of Chemical Contamination caused by Persistent Gas has been significantly reduced.

A big thank you to the incredibly dedicated group of players who helped us improving the C3 system!
